

F12

FORD F SERIES INSTALLATION BULLETIN

The Wired Rite Systems, Series 1, Ford F12 switch panel was designed for the following F-series trucks, which have a coin box: F250 HD, F350, F450, F550, F650, F750. The F650, F750 with air brakes, and the F150, F250 require a different switch panel. Cut a hole 6.5" wide X 2.5" tall. Locate the top edge of the hole 3/8" from the top of the coin box panel, centered between the cup holder and the left edge. This hole will accommodate a panel with 6 switches or less.

If you have any questions
or need help during
installation, please call
