

UPGRADE to SST-3

Aerial Start/Stop/Throttle & Emergency Power Module

EASY TO INSTALL • EASY TO CUSTOMIZE • EASY TO TROUBLE SHOOT

WIRED RITE SYSTEMS, INC. INTRODUCES THE NEW SST-3:

The ultimate Start/Stop/Throttle & E-Power module for aerial lift installation. Now with digital on-board display and programming. **SST-3** offers several new configuration options.

NEW UPGRADE FEATURES:

On-Board Programming

No Laptop Necessary! **SST-3** utilizes a Two-Segment display and 3 Pushbutton switches, allowing for multiple custom configurations.

On-Demand Positive or Negative Triggering

No need to rewire the board to change input triggering. **SST-3** will "sense" and adjust to the input signal.

Glow Plug Start Delay

A programmable feature that allows the vehicle's glow plugs to warm the engine prior to starting.

Variable Starter Interrupt

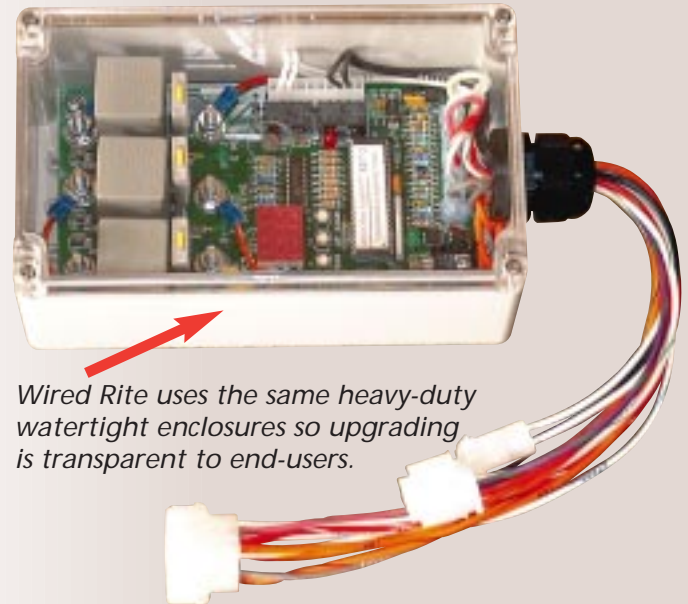

A programmable feature that allows for a maximum cranking time of the vehicle's starter.

Variable E-Power Interrupt

A programmable feature that allows a maximum time for the Emergency Power circuit to be engaged.

"Test Mode" for Bench Testing

On-board testing of the inputs and outputs via the "Test Mode" Two-Segment display.

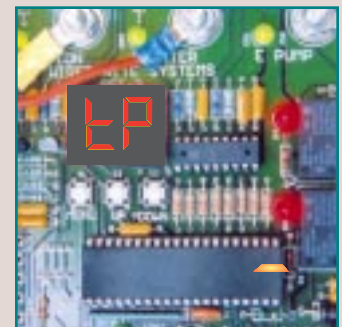

Wired Rite uses the same heavy-duty watertight enclosures so upgrading is transparent to end-users.

EASY TO READ DISPLAY

STOP

THROTTLE PLUNGER

OTHER FEATURES:

- On-Board 30 Amp E-Power Relay
- Reverse Polarity Protection
- 2 Throttle Relays for Multiple Idle Operations
- Field Serviceable Relays & Circuit Breakers
- Variable Throttle Time Function for GMC
- Direct Throttle Interfacing
- Pre-Wired with Color-Coded & Imprinted Wires
- Programmable E-Power Wait Time
- LED Status Indicators
