## Multi-Function Relay Control Board

From the leader of specialty vehicle electric systems, **MRCB-4** (Multi-function Relay Control Board) provides a rugged and reliable way to control and protect electrical circuits. Universal in design, **MRCB-4** will control up to four circuits and eliminate most of the hard wiring associated with alternative installations.

### **MRCB-4**

- Controls four circuits
- Separate user switchable positive and negative triggers
- Socketed and replaceable automotive type relays and circuit breakers
- Available with or without enclosure
- Mating connector and pins provided for relay coil inputs
- Rugged printed circuit board design will handle up to 40 amps, continuous load per circuit
- Easily mounts in a number of vehicle locations
- Compact size – 4" wide x 5.5" long

### **Typical Applications**

- Start/stop/throttle controller for non-insulated buckets in aerial manlifts
- Low current switching of high current circuits
- Controller for high current motor reversing applications
- Control and protect circuits switched by standard electrical switches
