

MINI PDC POWER DISTRIBUTION CENTER

Perfect for after-market electrical apparatus such as radios, chargers or switching!

Mini PDC is a compact, universal power distribution center developed as an economical and versatile means of protecting electrical apparatus on a vehicle.

Mini PDC's design incorporates a small circuit board footprint that is mounted to a universal underdash mounting bracket for easy installation

Two models of Mini PDC are available: A 30/40 system relay version and a 70 Amp soldered down version for high amp applications.

Four Switched and Two Constant Hot Circuits are incorporated for flexibility in powering and protecting various types of apparatus.

Four Switched and *Four Constant Hot Circuits* possible (consult factory).

Mini PDC comes pre-wired with safe and reliable GXL wiring for Battery, Ground and Ignition inputs.

The circuitry has been designed on a rugged PC board for durability and reliability.

Receptacles will accept ATC type fuses or blade style circuit breakers

Field Serviceable!
