

Series One Magnetic Circuit Breaker Switch Panels

LIFETIME GUARANTEED

Wired Rite Systems, Inc. presents our Series One, Lifetime Guaranteed Magnetic Circuit Breaker Switch Panels — the most reliable switch panel on the market. The Series One switch has state of the art circuit protection built into each switch. No longer does an installer require additional relays, solenoids, circuit breakers or fuses when installing these panels. Therefore, these panels install with minimal wiring and minimal labor — “one wire in, one wire out.” To help the operator identify each circuit and the functions they control, we provide a dual-stage back-lighting circuit that stays dim when the ignition is turned on, and intensifies 10 times when the switch is thrown. The LED’s used in the backlighting strip have a life expectancy of 100,000 hours. Each circuit is identified by a custom engraved acrylic “legend” that is rear loaded and easily interchangeable. Designed to fit either In-Dash or Under-Dash, the Series One switch panel makes any dash mounted panel look factory installed.

FEATURES

- Magnetic circuit breaker switches.

- “One wire in – one wire out” design.

- Switch physically shuts itself off when short occurs.

- Heavy-duty rocker design.

- Dual stage LED backlighting.

- 100,000 hour LED’s.

- Custom, interchangeable acrylic legend plates.

- Rear loaded legend plates.

- Optional pigtail harness available.

- Series 1 switch panel is Lifetime Guaranteed.

BENEFITS

- Faster trip time (milliseconds).
- Increased reliability.
- No nuisance tripping.
- No additional circuit breakers or relays required on outputs.

- Installs with minimal wiring.
- Decreases installation labor.
- Decreases several wires and crimps used in other switch panel designs.
- Increases performance of apparatus.

- Easy to troubleshoot.
- Will not reset until short is fixed.

- Increases the life of the switch.

- Identifies when circuit is engaged or off.

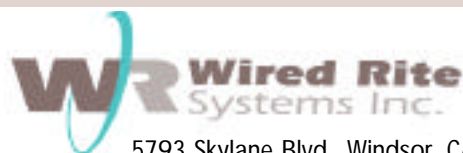

- Elongated backlighting life.

- Engraved to indicate accessory per customer’s specification.
- Easy to remove and replace if required.

- Will not fall out of its position.

- Eases installation.
- Color-coded and imprinted for easy identification.

- Peace of mind.
- Service for the life of the vehicle.
